

HIGH PERFORMANCE KVM SOLUTIONS

KNOWLEDGE BASE

WHAT IS IT?

For over 35 years, Adder has been developing market-leading KVM and connectivity products that bring control and peace of mind to customers managing mission-critical applications, across a wide range of industries. Adder's range of high-performance keyboard, video and mouse (KVM) solutions enable the real-time control of local, remote and global IT systems. Trusted by some of the world's leading organizations, from transport hubs like Heathrow Airport to leading post-production houses such as Skywalker Sound and Illumination Entertainment, Adder products are renowned for their technical excellence and reliable performance.

Adder enables customers to extend, switch and remotely manage their computers either locally or via an IP network. Adder's high performance IP KVM solutions improve user experience, desktop ergonomics and production workflows for customers around the world.

Adder's KVM switch technology is used by control room operators to access and manage multiple computers from a single workstation – often in a fast-paced and mission-critical situation. Adder's portfolio of Secure KVM products are used by Government and Military organizations around the world to securely access and manage computers – whether they are housed in a traditional command and control center or on a military submarine

QUESTIONS

1. Do you need to extend Video and /or Keyboard and Mouse?
2. Do you need KVM control?
3. Do you need mission critical KVM control?

KVM Solutions

Adder's high-performance IP KVM solutions utilize standard networking protocols for complete flexibility, bringing:

- Peace of mind to critical infrastructures
- Sharing and interaction of crystal clear, accurate data within secure networks
- Low latency, real-time, accurate control and management of remote systems
- Seamless integration with existing infrastructures and tailoring to specific needs
- Safeguarding of previous investments and minimal disruption to ongoing operations
- Straightforward expansion in terms of the number of workers or the size of the infrastructure
